# zidox

Document Management System

Alexandru LAPUSAN
CEO & Partner Zitec

Alexandru NOVAC
CTO & Partner Zitec

Next to people, information is a company's greatest asset, but its value can't be realized if it's not effectively managed and delivered to the right people, business applications and processes.

Steve Mills, senior vice president, IBM Software Group

Zidox DMS is "**Ready for IBM Systems with Linux**" certified

Platforms: IBM eServer i5 , p5, BladeCenter JS20, OpenPower

➢**Why another Document Management System?**

➢**Zidox Strong Points**

➢**Built on Open Source**

➢**Integrating into the OS Community**

➢**Building Open Source**

➢**Zidox in Action**

➢**Other Zitec Products**

➢ **Particular client needs**
General approaches and existing solutions do not always solve specific client problems (example: Constructions)

➢ **Costs**
Implementing a DMS can be a financial burden for most companies. Costs can include: licensing, software and hardware platform, implementation and maintenance costs.

➢ **Mobility**
You need access to your documents from everywhere. A web approach is a must.

➢ **How fast can you learn how to use a new software?**

➢ **How easy is to migrate existing documents?**

➢ **Future development flexibility**

✓ Web-based application

✓ Runs on LAMP platform (Linux, Apache, MySQL, PHP)

✓ Features a comprehensive list of scanning & editing features

✓ Handles big file transfers over HTTP/HTTPS, supports resume

✓ Powerful search engine integration – Xapian

✓ Features email & fax communications, incoming & outgoing

✓ Windows desktop support (Zidox Explorer)

✓ Event notification agent (Zidox Agent)

➢ **Linux OS** (also supports Windows, Mac or other Unix flavors)

➢ **Apache web server**

➢ **MySQL integration** (also supports others, such as IBM DB2)

➢ **PHP** - Most popular scripting language in web applications.

➢ **Xapian search engine integration**

➢ **Stay on course with what's going on**

➢ **Do not have to commit full time**

➢ **Even small things matter – just get involved**

➢ **Open Source does not mean software only**

➢ **Evolve on a professional and personal level**

➢ **Open up to other communities**

✓ **PHP5 Extension for Xapian**

- Historically there was only a PHP4 extension available; PHP5 had no support
- The PHP interface (coded in C++) connects PHP and Xapian library, allowing Xapian classes to be used from PHP
- The result is the ability to index and search for documents using Xapian, directly from PHP as local functions

✓ **Apache PUT module**

- Apache does not handle PUT specifically (file upload)
- OS module (coded in C) is processing PUT requests
- It enables Resume feature for file transfers
- Provides real-time & exact information on upload status

➢**Used in Construction Industry, Canada**
- One of the top construction companies in Canada
- The company has been using it since 2005 with all their projects being rolled out in the system
- Enables all stakeholders and 3rd parties access to the same information in real-time from any browser
- Specific needs in document processing (weather information, ever changing construction standards and regulations)

➢ **iSTARK , Canada**
- IT & Web division of Holcim group
- Deployment was performed on IBM Hardware & Middleware

➢ **Reper 21, Europe**
- A non-profit organisation focused on promoting CSR in European Union, especially in Central & Eastern Europe.

➢ **Leaders, Romania**
- A non-profit organization aiming to support the professional and personal development of young leaders.

➢**TreePath ECMS** (www.treepath.com)

- LAMP platform
- IBM (eServer, TotalStorage) and Apple (Made4Mac) certified
- Clients: JW Marriott, Tabu, Rom Autentic, Cassa Loco, Romanian Top 100 Singles Chart, Harley Davidson Owners Group Romania etc.
➢**EZ Census** (www.ezcensus.com)

- § LAMP Platform
- § Clients: Amadeus International, iStark, Proventys, Fitness Forward Foundation etc

➢**Zitec Analyzer**

- § LAMP Platform
- § Clients: IEBA Trust SSIF, Fortius SSIF
